

Remarks:

The term "needle-shaped" used in claims 36 and 50 in the amendment filed on December 6, 2002 is an obvious error and should be replaced with the term "needle-punched non-woven". A needle-punched non-woven element is an element formed from a non-woven which is worked on with needles in order to consolidate the non-woven.

Please charge any fees which might be due with respect to Sections 1.16 and 1.17 to the Deposit Account of Lerner and Greenberg, P.A., No. 12-1099.

Respectfully submitted,
